About Fireriskassessments.com

We are a national company offering Fire Risk Assessments for all types of premises, from communal areas for residents associations to large retail companies, care homes, schools and property management companies. We pride ourselves on the service that we offer our clients, which has led to a high number of renewals and referrals each year, which has helped the company grow.

Our main office is in Nottingham, and we have assessors based in locations across the UK who carry out assessments in their area. This benefits both the assessors and the environment.

We offer Type 1 and Type 3 non-invasive Fire Risk Assessments and accompanying reports. Where required, clients also receive access to our online basic fire safety awareness training, Fire Safety Policy, Emergency Plan and Logbook templates.

We also offer Fire Guidance and Fire Warden Training.

Fire Risk Assessors role

We're a rapidly growing company due to a number of referrals/renewals and larger contracts. We are looking to recruit a Fire Risk Assessor in the Swindon area, in order to cover the above locations. The ideal candidate should be happy to work alone, self-motivated and a good manager of their own time, as they would be working remotely from the office a majority of the time, however telephone contact will be made regularly. Confident and personable, they will be able to represent our company with a courteous manner and presentable appearance.

Candidates should be experienced in conducting Fire Risk Assessments in a variety of properties, from communal areas to large retail stores, schools, offices, care homes.

Candidates must be:

- Client focused – professional and approachable.
- Confident in communicating with landlords/health and safety managers/people in authority.

Telephone:
0808 252 4702

- Able to produce a Fire Risk Assessment report. Giving clear evidence to support findings and advice where required.
- Able to discuss findings in further detail with clients and, if required, local authorities/fire authority.
- Full knowledge and understanding of the Regulatory Reform Order (2005) and the guidelines to be applied for a Fire Risk Assessment.
- A registered IFE member at Technician grade or higher.
- Possess recognised qualifications relating specifically to fire safety.
- Computer literate, familiar with technology.
- Able to show evidence of previous Fire Risk Assessments and a minimum of 3 years relevant experience.
- Able to travel to assessment locations without difficulty or delay.

Additional desirable attributes would be:

- NEBOSH General and Fire certificate
- Registered IFE Fire Risk Assessor (any successful candidate not registered would be supported to apply for registration)
- Previous Fire service experience.

As part of our client requirements, we would carry out a basic DBS check on any successful candidate.

Opportunity

We have grown our business by offering a simple and consistent service, which is of the highest level and we're constantly striving to improve this. Our team is our best asset.

We are working towards BAFE accreditation and as such will be offering a minimum of 25 hours of ongoing CPD to ensure compliance with BAFE standards.

How to apply

To apply for the position, please send a copy of your CV, along with a covering letter detailing your relevant experience to Julia McMurray, by email to operations@fireriskassessments.com

If you would like further information prior to applying please contact the office on 0115 704 3112
